

**MUTANT
THOUGHTS**

BIOGRAPHY

Mutant-Thoughts embody the analog-digital crossover in flux - their unique brand of genre-defying rock is a frenetic amalgam of maximalist Latin-influenced beats, brooding synth-scapes and relentless rhythmic energy.

Colombian-born composer Han Luis Cera draws on the sounds of his roots - with bouncing claves set against rich synth textures, and the hip-shaking riffs of bassist Josh Lennox-Hilton - the band counterpose deep grooves with a lingering melancholia, making music which is darkly evocative while maintaining a strong pop sensibility.

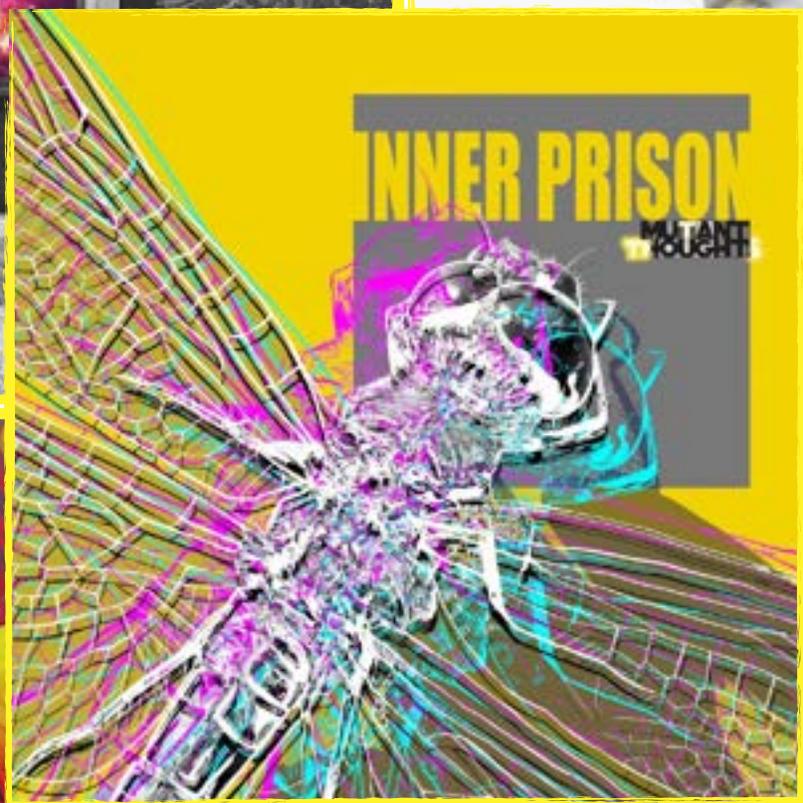

The band have had high profile attention - working with Grammy award-winning producer Sylvia Massy on their 'Reality Suspended' EP and playing at national festivals such as ArcTanGent, Wychwood, Dot-to-Dot and local alternative festival Simple Things in their hometown of Bristol.

In 2026, they are set to release their debut album 'MAKESHIFT_DNA' - bringing together their myriad soundscapes to produce a record steeped in technofuturism exploring the issues of cultural displacement and the spaces between communication and understanding.

'Anyone looking for the freshest, weirdest, grooviest music around should keep this band on their radar' - Tom Bruce, Noize UK
